Axeon

PARTNER BRIEF · CPAS & PRACTICE ADVISORS

The revenue your clients lose after 5 PM.

A short brief for the advisors private practices already trust: where new-patient and new-client demand slips through the front desk, how Axeon closes the gap, and how you can bring it to your clients.

DENTAL & MEDICAL CPAS

You already see the numbers. This shows where part of the top line goes.

PRACTICE CONSULTANTS

Front-desk follow-up is an operations problem you can now hand off.

LEGAL & ACCOUNTING ADVISORS

The same gap exists in firms that sell high-value engagements.

IN ONE SENTENCE

Axeon installs a managed intake system that answers every missed call and web inquiry within 60 seconds, books the consultation, and asks every patient for a review, so practices keep the demand they already pay to generate.

Axeon Studio · West Des Moines, Iowa · hello@axeonstudio.co · (515) 493-8017 · axeonstudio.co

01 · THE PROBLEM

A leak that never shows up on the P&L

When you review a practice, you look at overhead, supplies, payroll and chair or attorney utilization. What rarely gets measured is the demand that arrived and was never answered.

A prospective patient calls at 5:40 PM, reaches voicemail, and does not leave a message. Someone fills out a web form on Saturday and hears back Monday afternoon, after booking somewhere else. None of this appears as a line item. It shows up only as a new-patient number that stays flat while marketing spend goes up.

The usual fixes are expensive. Another front-desk hire adds payroll and still covers only business hours. A bigger ad budget sends more traffic into the same slow follow-up. Neither one addresses when, and how fast, the practice responds.

ILLUSTRATIVE EXAMPLE

What the gap can look like in one practice

These are assumptions for discussion, not a benchmark. We replace them with your client's real numbers during the free audit.

ASSUMPTION	VALUE
Calls and web inquiries outside office hours, per month	30
Consultations lost to slow or no follow-up, per month	5
Of those, cases that would have gone ahead	2
Average case value (implants, aligners, aesthetics, retainers)	$3,500
Revenue not captured	**$7,000 / mo · $84,000 / yr**

At these numbers, the practice needs about three recovered cases a year to cover a full year of AxeonCORE ($9,588).

Why it matters to you as the advisor

- ✓ It is top-line revenue recovered without adding headcount, which shows up directly in margin.
- ✓ It is measurable. Every recovered call, reply and booking is logged, so the result can be reviewed in your next advisory meeting.
- ✓ It costs your client a fixed monthly fee, not a percentage of revenue or ad spend.

02 · WHAT AXEON INSTALLS

One managed system, three layers

Axeon is not a marketing agency and does not sell traffic. We install and run the intake layer that sits between a practice's phone, website and calendar.

LAYER 1

The practice website

A fast, mobile-first site built around credentials, providers, services and clear pricing ranges, with one obvious next step on every page: call, text or book.

LAYER 2

24/7 speed-to-lead

Missed calls get a text back automatically. Web inquiries get a reply within 60 seconds. The conversation leads to online booking, and staff are pinged when a person is needed.

LAYER 3

Review engine

After each appointment, patients get a short request to review the practice on Google. More recent reviews help the practice show up in local map results.

AxeonPROOF: the client portal

Every practice gets a live portal showing recovered calls, replies, bookings and reviews, plus change requests and monthly reports. It's the same data you can review with them.

Plans

MOST PRACTICES

AxeonCORE · $799 / month

- Website, speed-to-lead, review engine, AxeonPROOF
- 12-month agreement; the $3,000 implementation fee is credited in full
- Hosting, security and up to 2 hours of content updates a month
- Annual prepay available: $7,990 (two months at no charge)

MULTI-PROVIDER PRACTICES

AxeonGROWTH · from $1,999 / month

- Everything in AxeonCORE
- Google Local Services Ads and search management (ad spend separate)
- Quarterly reactivation campaigns to past patients
- AI receptionist, multi-provider routing, quarterly video and photo

Commitments we put in writing

- ✓ **90-day performance commitment.** If the system isn't live on schedule, replies aren't going out within 60 seconds, or review requests aren't sending, and we don't fix it within 15 days of notice, the practice can leave with no remaining fees.
- ✓ **Territory exclusivity.** We work with one practice per specialty within five miles.
- ✓ **Ownership.** The practice's domain, Google profile, main phone line and patient data are always theirs.

03 · START WITH A FREE AUDIT

A 3-minute check you can run, or we run for you

Before anyone talks about pricing, we show the practice what is actually happening. The audit is free, uses only public touchpoints, and needs nothing from the practice's systems.

1. **The 5:15 PM test call**
   We call the main line just after closing on a weekday and note whether it ends in voicemail, rings out, or triggers a text back.

2. **Review velocity check**
   We compare the practice's Google rating, total reviews and reviews in the last 30 days against the top nearby competitors.

3. **Mobile speed and next-step check**
   We load the website on a phone over cellular data, time it, and check whether calling, texting or booking is visible without scrolling.

What you receive

A short video walkthrough of the findings, plus a one-page recovery estimate built from the practice's own numbers. You can share it with your client as is, or present it in your next meeting.

A simple pilot

1. **Pick two or three clients**
   Good candidates have front-desk turnover, flat new-patient numbers, or few recent reviews.

2. **Send us the practice names**
   We run the free audit and send you the video and recovery estimate. We don't contact the practice unless you ask us to.

3. **Review it at your next meeting**
   If the client wants to proceed, we take it from there and keep you updated. If not, nothing changes.

Two ways to partner

Choose whichever fits your firm and your professional obligations. Both options include priority onboarding for the clients you refer.

OPTION 1

Technology Advisory Share

15% of each referred practice's monthly fee, every month they stay a client. It's set out in a one-page Technology Advisory Agreement, and each client gets a written disclosure.

OPTION 2

Client fee credit

No payment to your firm. The same value goes to your client as a discount on their monthly fee. This is the simple choice when independence rules or firm policy rule out referral fees.

What Option 1 is worth

ACTIVE REFERRED PRACTICES	PER MONTH	PER YEAR
1 on AxeonCORE	$120	$1,438
10 on AxeonCORE	$1,199	$14,382
1 on AxeonGROWTH (from $1,999 / mo)	from $300	from $3,598

The share is calculated on the plan fee actually paid, not ad spend or one-time items, and is paid monthly for as long as the practice stays a client.

Compliance and fit

- **Your professional rules come first.** Please confirm the Technology Advisory Share fits your obligations. For CPAs, that means the AICPA commission and referral-fee rules and your state board's rules. Referral fees generally can't be taken from clients for whom you perform attest work. Option 2 is there for exactly those cases.
- **Written disclosure.** We give each referred client a short written disclosure of the arrangement, so it's on the record.
- **No patient health information.** Our intake collects only a name, contact details, the service of interest and a preferred time. It is configured not to ask for symptoms, diagnoses or insurance details.
- **Consent-based messaging.** Texts go only to people who contacted the practice or are its patients, with opt-out handling built in.
- **Clear terms.** Fixed monthly pricing, a written 90-day performance commitment, and the practice keeps ownership of its domain, profile, main line and data.

05 · NEXT STEP

Send us two names

The easiest way to evaluate Axeon is to see the audit on a practice you already know. Send two or three client names and we'll return the findings within a week, with no cost and no obligation for you or the practice.

60 seconds
to first reply on every missed call and web inquiry

24/7
coverage, including evenings, weekends and holidays

3 minutes
to run the audit on any practice

Who Axeon is

Axeon Studio is an Iowa company based in West Des Moines that builds websites, intake automation and client portals for local businesses. I'm the founder and I work with each practice directly. You'll deal with the person who builds and runs the system, not a sales team.

CONTACT

Hayder Hatem, Founder
Axeon Studio · West Des Moines, Iowa
hello@axeonstudio.co
(515) 493-8017
axeonstudio.co

To request an audit, send:

- The practice name and city
- The main phone number and website
- Whether you'd like us to contact the practice, or just send the findings to you

This brief is for discussion with professional advisors and isn't an offer or a contract. Pricing and terms are set out in each practice's Client Services Agreement and each partner's Technology Advisory Agreement. Figures labeled illustrative are assumptions, not guaranteed results.
